City of Minneapolis Post-Election Review, November 21, 2013
For Municipal Election held on November 5, 2013

Agenda

9:00 a.m. Welcome & Introductions; Review of scope

9:05 a.m. Oath of Election Judges

9:10 a.m. Training of Election Judges – Minneapolis Method

9:15 a.m. Post-Election Review begins

Group 1 - Council	**Group 2 – Board of Estimate & Taxation**
Ward 6-Precinct 3	Ward 9-Precinct 1
Ward 10-Precinct 2	Ward 2-Precinct 8

Each group has three teams of two election judges for a total of six.
Each group will work on one precinct at a time until completion.
Teams of two may take turns taking a break between appropriate steps.
One team must remain at the table with the ballots at all times.
The teams will stagger taking lunch during mid-day.

City of Minneapolis Post-Election Review, November 21, 2013
For Municipal Election held on November 5, 2013

Background

The City Minneapolis administers the municipal election using the Ranked Choice Voting (RCV) method. Election night winners are determined by the first choice vote totals. Races that cannot be determined by the first choice vote totals proceed to round-by-round RCV tabulation.

Tabulation of races that could not be determined on Election Night, November 5, 2013 was completed by November 8th. The election results were canvassed on November 12, 2013.

Selection by lot offices and precincts to be reviewed

Municipal Ordinance Chapter 167 requires four random precincts be drawn by lot at the canvass to conduct a post-election review of the voting system. The results of the drawing:

Council precincts:	Ward 6 Precinct 3 and Ward 10 Precinct 2
Drawing of multiple-seat office:	Board of Estimate and Taxation
Precincts:	Ward 9 Precinct 1 and Ward 2 Precinct 8

Scope of Post-Election Review

The City of Minneapolis established the Post-Election Review of Voting System as a voluntary process to determine and demonstrate the accuracy of the ballot data used to determine the winners of the municipal election.

Results from the ballot counters were submitted to Hennepin County Elections to compile election night results and the Cast Vote Record (CVR) file. The CVR is an Excel file which links the three choice ranking of each race on the ballot. This ballot data is used in RCV tabulation.

The scope of the 2013 Minneapolis Post-election Review is to document the accuracy of the Cast Vote Record (CVR) file, votes read by the ballot counters, for RCV tabulation.

Minneapolis Method - Instructions to Election Judges - 2013 Post-Election Review

The Minneapolis Method will be used to count the four randomly drawn precincts for the 2013 Post-Election Review. Each precinct will be counted by three teams of two election judges, for a total of six election judges per precinct. Ballots will be sorted down to the unique 3-choice combination. Working in pairs of two election judges, the steps to conduct the hand-count by precinct are...

Preparation

1. Open the secured voted ballots of the precinct: polling place and absentee ballots. Make sure all absentee ballots are fully unfolded.
2. Combine all the ballots into one precinct pile and then divide among the teams working on the precinct
3. Stage the ballots by orienting the ballots all face-up, head-up
4. Count the total number of ballots in the precinct using the pile method: teams of two election judges silently count the pile of ballots into groups of 25, staggering each pile of 25 into one large pile. Compare the total count to the CVR count.
5. Review the table-layout and note space and abbreviations for each candidate on the ballot, write-ins, overvotes and undervotes.

Determining Ballot Counter Intent vs Voter Intent

If at any point, election judges see a questionable, incomplete or stray mark on a ballot that may have affected how the ballot counter read the ballot, they should bring it to the attention of the Election Officials:

1. Raise your hand to show the ballot to an election official
2. Two Elections Officials will review the ballot and advise on reading as to which candidate or category is likely read as by the ballot counter
3. Election Officials will document probable and possible reading of vote(s) and include reason and initials
4. The document will be attached sticking out from the right edge of the ballot

Sort by column choices

Both election judges have their eyes on the same ballot for each action.
Teams may take turns taking a break between appropriate steps. One team must remain at the table with the ballots at all times.

1st column: Sort all of the ballots based by the first-choice column for each candidate/category by placing the ballot below each candidate name/category. After all the ballots are sorted, combine the first-choice ballots from each of three counting tables onto the center table by the corresponding name/category. Fill out a Ballot Summary Sheet for each pile by filling in the **Choice 1** column and place on top of pile.

2nd column: Sort ballots of each first-choice column candidate/category to the unique 2-choice combination by placing the ballot immediately (leaving the nearest edge of the table available for the 3rd column sort) below each candidate name/category with

a. One team sorting the largest pile
b. The other teams begin with sorting the smallest piles

Fill out a Ballot Summary Sheet for each pile by filling in the **Choice 1 & Choice 2 columns** and place on top of pile.

3rd column: Sort ballots of each 2-choice combination to the unique 3-choice combination by placing the ballot below each candidate name/category

Count each unique 3-choice combination

1. Two election judges move each ballot from one pile to another to double-check the unique 3-candidate/category combination.
2. While using the pile method to count the number of ballots with that unique combination, both election judges verify the 3-candidate combination of each ballot.
3. Fill out a Ballot Summary Sheet for each unique combination.
4. Make a stack of all counted ballots, with a colored piece of paper separating different 3-candidate combinations
5. Place the completed Ballot Summary Sheet in the bin provided.

Review the Count

1. Two election officials will enter each Ballot Summary Sheet total to the corresponding 3-candidate combination on the Cast Vote Record worksheet.
2. One election official will read the 3-candidate combination and total count. The second election official will find the corresponding combination on the worksheet, and enter the total count and verbally confirm the 3-candidate combination and count.
3. When the ballot counting and entry of all 3-candidate combinations is completed, two election officials will verify the Cast Vote Record count and hand count totals match and/or identify any discrepancies.
4. When the process is completed, the ballots will be sealed and stored by precinct as required by Minnesota law.

City of Minneapolis Post-Election Review, November 21, 2013
For Municipal Election Held on November 5, 2013
Summary of Results

PROCESS

- The Minneapolis Method was used to sort the ballots into the unique 3-choice combination for the race reviewed. Ballot totals for each unique 3-choice combination were entered on a Ballot Summary slip.
- The Ballot Summary slip totals were entered onto the Post-Election Review worksheet for comparison and verification to voting machine count (Cast Vote Record file).
- Each Post-Election Review worksheet listed all potential 3-choice combinations, machine count and hand count totals.
