The table below shows the total number of election judges that attended each of the eight sessions, and how many were 'assigned' to each session. In addition, Table 1 shows attendance to these sessions by category of election judge. The three categories of election judge that attended these classes were 'student judges,' 'team judges' and 'head/assistant head judges.' Of the 395 election judges that were assigned to these classes, 329 attended, yielding an attendance rate of 83%. Student judges comprised 177 of the 329 Election Judges in attendance, or 54%, and team/head/assistant head judges made up the other 46%. This is very close to the target of a 3:5 student judge to team/head/assistant head judge ratio for attendance to these classes.

The following graph shows a comparison between the attendance for student, team, and head/assistant head judges for each of the eight classes. For the sessions held at Henry and Edison, team judge attendance was higher than student judge attendance, but the reverse was true for those held at South and Southwest. Student judge attendance was highest at South (65 in total), and lowest at Edison (15 in total.) While student election judge attendance at Edison High School was low, it is important to note that Edison High School hasn't had a student election judge cohort since 2010, therefore it is a positive development to have students from Edison interested in serving as student election judges again.
